GPC

DEDICATED INTERNET ACCESS

GREAT PLAINS COMMUNICATIONS

A consistent, secure connection for your business

Businesses today rely on consistent, reliable Internet connectivity to power the day-to-day operations of their organizations. To ensure constant connectivity and consistent bandwidth to power your most vital applications, choose Dedicated Internet Access (DIA) from Great Plains Communications (GPC). DIA offers a high-performing, private connection to the Internet that delivers symmetrical upload and download speeds for uninterrupted Internet access, backed by a company with over a century of experience providing forward-thinking technology solutions to businesses across the Midwest.

BENEFITS OF DIA

LOW LATENCY

Improve application performance with a premium, low latency service with an average delay of less than seven milliseconds

SYMMETRICAL BANDWIDTH

Reduce internal network congestion and boost employee productivity with symmetrical upload and download speeds

DEDICATED INTERNET CONNECTION

Ensure reliable and uninterrupted connectivity with a private, secure connection with dedicated bandwidth

ENHANCED SUPPORT

Service level commitments supported by our 24x7x365 Network Operations Center (NOC)
